

## XenDesktop 5 Proof of Concept

Experience in less than 2,5  
days the benefits of Citrix  
XenDesktop

### How? By implementing a XenDesktop Proof of Concept

To explore and discover the possibilities of XenDesktop, we help you build a small environment, requiring only a minimum use of your IT infrastructure, resources and time. In this environment you can run, test and evaluate how some of your applications work under XenDesktop. The PoC architecture will be built on a XenServer platform within your own environment to create an as realistic possible situation.

If this Proof of Concept is successful you can be assured that a broader implementation will work as well.

**The budget required for this Proof of Concept is € 1.990 (excl. VAT).**

### What we will do for you

#### Day 1

- Kick off meeting: setting the goals for the PoC and giving an overview of the XenDesktop architecture
- Installation of XenServer
- Import of virtual servers for:
  - \* Citrix License Server
  - \* Citrix Web Interface
  - \* Citrix Delivery Controller
- Allocation of demo licenses
- Creation of Windows 7 / XP template
  - \* OS customisation
  - \* XenDesktop Agent installation in OS
  - \* offering Microsoft Office in OS

#### Day 2

- Installation of 1 custom application of your choice in OS template
- Creation of 5 virtual Windows 7 / XP PC's
- Installation of XenDesktop Client on 5 workstations
- First tests on the XenDesktop installation
- Training of administrators
- Establishing a test plan

#### Day 3 (After 2 weeks testing)

- Evaluation workshop of half a day

# CITRIX® XenDesktop 5

## The proposed environment

## Possible Extensions

You can even **enrich the Proof of Concept of XenDesktop** by adding other services you would like to test.

- OS Streaming (*Provisioning Services*)
- Online applications / Offline applications (*Citrix XenApp / Citrix Application Streaming*)
- Secure access for virtual desktops
- User Workspace Management
- High Availability (*XD Design Handbook*)
- High graphical applications
  - \* High graphical monitor
- Additional custom applications to be included
- Feasibility and capacity planning report

## 5 reasons to request a PoC

1. You get insight in the use of the XenDesktop architecture
2. You get a real test in your user environment
3. We give you a full evaluation of the VDI environment during a short workshop
4. Customize the Proof of Concept with other extensions
5. Special price offer for this PoC: 1.990 EURO (excl.VAT)
